1. Reference your letter TCS-2921-58, dated 30 April 1958, subject as above.

2. It is requested that positions listed below be approved as Army TALENT Billets in connection therewith:

- a. Position: Chief, Acoustic Correlation Center.
Justification: Requires access to all missile and satellite information to direct the Center's work in correlating acoustic data on missile and satellite activity with all-source data for analysis and integration.
- b. Position: Executive, Acoustic Correlation Center.
Justification: Requires access to all missile and satellite information in insuring effective day-to-day operation of the Center.
- c. Position: Technical Assistant.
Justification: Requires access to all missile and satellite information to fulfill responsibility for acoustic collection, planning, and integration of all-source data with acoustic data.
- d. Position: Chief, Reports Division.
Justification: Requires access to all missile and satellite information to prepare and direct preparation of reports relating missile and satellite acoustic events to other data on missile and satellite activity.
- e. Position: Reporting Engineer (2).
Justification: Requires access to all missile and satellite information to prepare correlation reports relating missile and acoustic events to other data on missile and satellite activity.
- f. Position: Chief, Analysis Division.
Justification: Requires access to all missile and satellite information to analyze and direct analysis of missile and satellite acoustic events in the light of all-source information.

SUBJECT: Arlington Hall Sub-Center, U.S. Army

g. Position: Analyst (2).

Justification: Requires access to all missile and satellite information to analyze missile and satellite acoustic events in the light of all-source information.

h. Position: Stenographer (2).

Justification: Requires access to missile and satellite information for stenographic work in preparing analytical reports relating acoustic events to missile and satellite activity.

i. Position: Chief, Missiles and Satellites Branch.

Justification: Requires access to missile and satellite information without restriction in order to direct the research and production effort of engineers in the Missiles and Satellites Branch.

j. Position: Interpretation and Analysis Engineer.

Justification: Requires access to missile and satellite information without restriction in order to provide proper interpretation and analysis of current Soviet activity. Specialization will be made in the interpretation of the output from a few of the very best sources to provide accurate and valid answers on a sound basis. Requires best information available in order to give proper guidance to special contractor projects.

k. Position: Guidance and Control Engineer (2).

Justification: Requires access to all available information on missiles and satellites, particularly guidance and control data. Requires access to data from best possible sources in order to evaluate properly data on system elements from a stream of unconnected fact and fiction.

l. Position: Vulnerability Engineer.

Justification: Requires access to all available information on missiles and satellites, particularly those aspects which yield data on the vulnerable elements of systems, a subject of paramount importance to Signal Corps. A high degree of specialization in the vulnerability of foreign systems is required to create the climate in which such information will be sought out and recognized.

m. Position: Instrumentation and Operations Engineer.

Justification: Requires access to all available information on missiles and satellites, particularly range instrumentation. Requires access to data on operational hardware and its functioning. Specialization in the fertile field of instrumentation, training, and operational development, considered in concert, is required.
